

AMENDMENT TO THE ABSTRACT

Please delete the present Abstract of the Disclosure.

Please add the following new Abstract of the Disclosure:

To provide a grease composition for auxiliary machinery of automobile electrical component containing an aromatic ester oil-containing base oil having a specific diurea compound as a thickener blended therewith and a rolling bearing having the foregoing grease composition packed therein. The foregoing grease composition and rolling bearing do not generate abnormal noises even at an extremely low temperature of -40°C, have excellent seizure resistance even under a high temperature closed to 180°C, have excellent rust preventing performance, and are suitable especially for electrical parts and auxiliary machineries of engines, etc.
